

Auth: Analytics of Utility Things

Insight Data Engineering, New York

Business Problem?

- Current utility systems are outdated and managing these systems is largely manual.
- Utility systems are increasingly getting connected and existing systems are used for monitoring at energy companies.

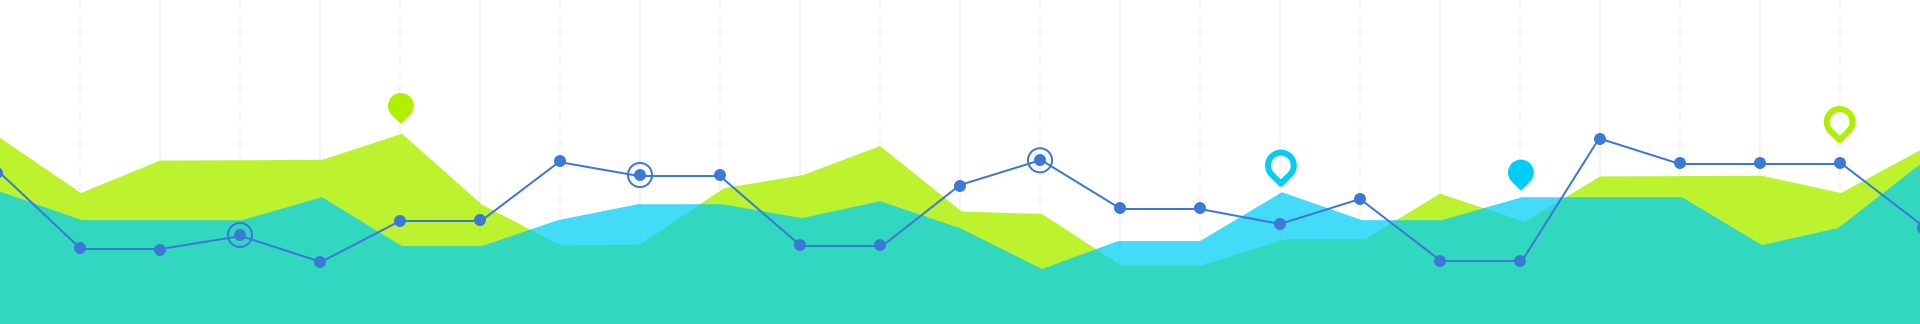

Data Pipeline

Challenges

- Simulating data in a scalable manner
- Learning and understanding pros/cons for each and every technology in my stack
- Implementing and learning new technologies

Demo

I am **Ajay Kavuri**

Programmer. Crawler. Happy soul.
